

# ELASTOCRAFT (BPC)

(COTTON CREPE BANDAGE)

---

## DISCRIPTION:

Characteristic fabric of plain weave, in one continuous length containing no joins, clean, reasonably free from weaving defects, cotton leaf and shell, and having interlocked edges.

It is made of a simple weave in which two folded crepe twisted cotton threads form the warp, and a mix of cotton and wool threads or cotton and rayon threads form the weft

## FEATURES:

- It is 100% cotton warp threads permits the bandage to be wrapped without difficulty and with ease over different body parts.
- Crepe bandage do not obstruct muscular or joint flexibility.
- Better Elasticity, controlled, uniform & smooth pressure.
- Specially designed plastic clips for firm support

## INDICATIONS:

- It is used as for all chronic-leg conditions varicose veins and their after-care.
- It is used as a pressure dressing for burns, for skin grafts.
- Crepe Bandage is used whenever elastic support is needed for treatment of strain, sprains and similar conditions.

## PRECUATIONs:

- The bandage must not be tied too tightly because that could restrict the blood circulation.
- If increased pain or a tingling sensation, remove the crepe bandage and tie it again snugly.
- Remove the crepe bandage before going to bed.
